# WI-CONTROL

## Fully online transport management process (TMS)

*Closed circuit with your carriers*

- » Integration of WI-CONTROL in our system, which allows an automation and optimization of all the steps of the process.
- » Variable configuration of the types of trading: auction, manual, automatic, first to accept, etc.
- » Information and control of the subcontracting that the load has.
- » Possibility of verifying companies, vehicles and drivers.
- » Permanent record file with all loads, vehicles, drivers, and companies, to make reports and statistics.
